

REMARKS

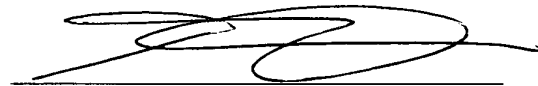

By this preliminary amendment, new claims are being added to more fully recite and protect that which Applicants regard as the present invention.

In the same manner as done in the parent application in response to the objection in the Office Action of March 18, 2003, Applicants are hereby amending the specification, as submitted in the attached substitute specification, to incorporate the subject matter disclosed in an Appendix originally filed with the parent application. Consequently, the drawings or screen shots from the Appendix are also added to the specification, as shown above, as new Figs. 27-31. No new matter has been entered in the substitute specification.

Also, Applicants respectfully submit that each "table" immediately follows or precedes its description, and each "table" is considered as textual description of the present invention. Hence, there is no need for labeling the "tables".

Prompt examination on the merits is respectfully requested.

Respectfully submitted,

Tim L. Brackett, Jr.
